

## Grateful for 2021

### Message from the President December 31, 2021

---

### Dear friends,

2021 has reached its end and has not been without its challenges. As the world was hopeful for a better year than 2020, the ongoing pandemic has presented many challenges in 2021 for many organizations including for Congo4Tomorrow. At times when the going got tough, it was the support of our partners, sponsors and the tenacity of our dedicated volunteers that helped

us see through the fog.

Despite those challenges, we were able to reach some of our goals and meet some of our program milestones. We were able to start creating our *Mobile Library* through our Didactic & Innovation program by receiving your generous donations of hundreds of books both in French and in English. Through our Community Development program, we were able to start collecting funds to rehabilitate the school environment in one of the six low-income schools that we work with in Kinshasa, DRC. We could not have done it without your support and compassion for our children and teachers. For that I would like to say thank you from the bottom of my heart.

Your continued support helps us remain grateful for what we will be able to accomplish in 2022.

I hope you had a wonderful end of 2021 and I wish you an amazing year in 2022. HAPPY NEW YEAR!

*Franck T. Kamangu*

Franck Kamangu  
President and CEO  
Congo4Tomorrow
